Download the free version of ZoneAlarm, free Firewall software that protects your computer from intrusions while online. Stop anyone from gaining access to your computer, control which programs access the internet and lock your computer so that there is no internet activity. I use this program and I recommend it for safety and peace of mind. I highly recommend it for DSL and Cable access users

<http://www.snapfiles.com/get/adaware.html>

An excellent free spyware privacy tool that scans your computer for known data-mining, aggressive advertising and tracking components. The program then asks you if you want to delete or quarantine the potentially harmful files found.

<http://www.craigslist.org/about/sites>

The most popular and most visited free classified ad website on the internet. Whether buying or selling, Craig's List offers a huge following.
